

CONGRATULATIONS LidRock.

LidRock was just announced the winner of the 2005 **Consumer Housewares Award!** This award is presented annually by the Society of Plastics Engineers. LidRock was presented this award because they developed a way to fit an ENTIRE music CD into a fountain drink lid WITH a straw going through the middle of the CD. The best part is that the CD can be either 3 inch OR 5 inch, play in your CD player or computer and it doesn't even get sticky because of the excellent and innovative design of the plastic lid.
